

## Assignment 3.1: How a Company Hires

### Instructions:

Speak to someone at a business who does hiring to learn about their hiring process. This could be a manager, owner or HR personnel. Explain that you are doing an assignment for this course and would like to learn about how they currently do their hiring. The conversation should take about 30 minutes. Do this on your own, without a partner.

| General Information                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                             |                  |                 |

| <b>Employee's Name:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Patricia Farah              | <b>Position:</b> | HR Specialist   |
| <b>Company:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Huawei Technologies Lebanon |                  |                 |
| Questions                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                             |                  |                 |
| <b>1. What are they looking for when they hire (skills, behaviors, attitudes)?</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                             |                  |                 |
| <p>When hiring they look for candidates with a strong technical knowledge in fields like ICT, telecommunications, artificial intelligence, computer science, cloud and computing, and the hardware of network devices, as well as good communication and problem-solving skills. In terms of behaviour and attitudes, they value employees who are adaptable, willing to learn, and able to work in a team. They also look for candidates who show initiative and genuine interest in technology and innovation, as the R&amp;D department is their biggest sector.</p> |                             |                  |                 |
| <b>2. For what types of jobs do they hire entry-level/recent graduates?</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                             |                  |                 |
| <p>They hire recent graduates mainly through their Campus Recruitment Program, offering entry-level roles such as software engineering, software testing, data engineering, and network engineering. These programs are designed to give new graduates hands-on training and mentorship as they begin their careers in the ICT field.</p>                                                                                                                                                                                                                               |                             |                  |                 |
| <b>3. How many applications do they typically receive for a position at your level?</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                             |                  |                 |
| <p>The HR specialist mentioned that Huawei receives a very high number of applications for each open position, given its reputation as a leading global ICT company. While she did not give an exact number, she noted that the competition is strong, especially for entry-level and graduate roles, since Huawei hires more than 10,000 graduates every year worldwide and draws applicants from universities globally, making the selection process highly competitive.</p>                                                                                          |                             |                  |                 |
| <b>4. How much experience does an entry-level hire need?</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                             |                  |                 |
| <p>The HR specialist explained that, like most companies, having relevant side projects and coursework is seen as a plus, but it is not a strict requirement for entry-level roles. Huawei places a strong emphasis on training new hires internally, providing structured, hands-on training</p>                                                                                                                                                                                                                                                                       |                             |                  |                 |

programs once they join the company. This allows candidates with limited prior experience to still be considered, as long as they show strong technical foundations and willingness to learn.

**5. *How do they look for new employees? Do they use online job boards? Which ones? What other methods?***

The HR Specialist explained that Huawei uses a mix of methods to find new employees. They post open positions on online job boards such as LinkedIn and Bayt, which help them reach a wide pool of candidates across Lebanon and the broader region. They also rely heavily on university partnerships, working directly with schools to recruit students through training programs, and competitions.

**6. *Do you have a copy of your application form that I could use to review in my class? While the HR specialist?***

While the HR Specialist could not share the actual document, she explained that Huawei uses a filtering system to first screen incoming applications and CVs before moving to a manual review stage. Candidates who pass this initial filtering are then manually reviewed by the HR team, and those who meet the requirements are contacted for interviews.
